Santiago.Oroz1510@gmail.com

<https://www.linkedin.com/in/santiago-oroz/>

Associate Degree in Data Science and Artificial Intelligence focused on intelligent software development. Specialized in transforming data into business solutions through automation, predictive models, virtual assistants, and generative AI. Passionate about integrating full-stack development and Python with the latest AI technologies to optimize real-world processes. Practical, self-taught, and results-oriented profile. Winner of 1st Place in the Samsung Innovation Campus (SIC) Capstone Project with a focus on social impact.

EXPERIENCE

RAG Chatbot with Local LLM | El Dorado SRL | Oct 2025 - Nov 2025

- Design and development of a RAG (Retrieval-Augmented Generation) Chatbot for technical inquiries about concrete, reducing client response time. Implementing Speech-to-text and Text-to-Speech (TTS).
- Implemented ChromaDB for document vectorization and local LLM (Llama 3), ensuring privacy and precision.
- Developed an interactive user interface to facilitate access to technical information.

Data Analysis Intern | Newsan | Oct 2024 – Dec 2024

- Collaborated in the data lifecycle, from cleaning to visualization for the Ergonomics department.
- Developed automation scripts (macros) for efficient information extraction, saving hours of manual work.
- Created Power BI Dashboards to monitor ergonomic risks, presented to management.
- Developed a rotation recommendation model to optimize employee ergonomics and prevent injuries.

PROJECTS

AIDA | Winner, 1st Place Capstone Project at SIC (Samsung) | Oct - Dec 2025

- Chatbot designed to assist older adults, integrating reminders and conversational assistance.
- Winning project highlighted for its technical viability and social impact among +30 teams.
- Recognized by a jury of experts from Samsung, Randstad, and Streambe, awarded with an S24 phone.
- Collaborative work of 3, using version control with Git and modular Object-Oriented Programming (OOP).
- Deployed to production on Linux VPS (Donweb) and integrated webhooks with Make.

Hotel Demand Prediction System | Academic Project | Jun 2025

- Developed a Machine Learning model (XGBoost) to predict hotel occupancy in Tierra del Fuego.
- Performed exploratory analysis, data cleaning, and Feature engineering to optimize model accuracy.
- Visualized tourism trends for strategic decision-making.

TECHNICAL SKILLS

- Languages & Core: Python (Pandas, NumPy, Scikit-learn), SQL.
- IA & Data: RAG, LangChain, ChromaDB, Machine Learning, XGBoost, Random Forest.
- Web & Tools: Flask, React (Basic), Git/GitHub, Power BI, Excel (Macros), Make Workflows.
- Languages: Spanish (Native), English (Intermediate - B1/B2).

EDUCATION

- Associate Degree in Data Science and Artificial Intelligence | Centro Politécnico Malvinas Argentinas | Jan 2024 - Nov 2025
- Samsung Innovation Campus - Artificial Intelligence | Samsung | Jun 2025 - Dec 2025
- Artificial Intelligence for Business | Digital House | May 2024 - Jan 2025
