AI Engineer and Higher Technician in Data Science. I build assistants on **private LLMs (RAG)**, process automation, predictive models and computer vision that **run in production**, focused on on-premise deployments where data cannot leave the client's network. **National first place** in the Samsung Innovation Campus 2025 Capstone.

EXPERIENCE

Artificial Intelligence Engineer — Tech del Fuego | Apr 2026 – Present | Río Grande, hybrid

- Member of the **founding team** of a cybersecurity, AI and data science firm. Automation of invoicing, document management and reporting, removing hours of manual data entry per week.
- Deployment of **private LLMs** and voice and text WhatsApp assistants wired into CRMs, keeping client data inside the company.
- Power BI** dashboards for predictive analysis and profitability control; bias auditing and model security review.

AI Developer, professional placement — El Dorado SRL | Oct – Dec 2025 | Remote

- On-premise RAG chatbot** for technical queries on concrete and ISO standards, with a **Llama** model running inside the client's network: zero data leaving it.
- ChromaDB** vector store over technical PDFs and an internal wiki; every answer cites the sources backing it.
- Flask** API, **React** frontend and a voice pipeline with speech-to-text and text-to-speech.

Data Analysis Intern — Newsan, Motorola plant | Oct – Dec 2024 | Río Grande

- Business Intelligence** tool letting Health & Safety identify critical workstations and simulate staff rotation schemes to reduce physical fatigue.
- VBA** automation of production report cleanup, saving hours of manual work every week.
- Power BI** dashboards with ergonomic risk heat maps, presented to management and used to rotate staff and prevent injuries.

PROJECTS

AIDA — Winner, 1st place, Samsung Innovation Campus Capstone | 2025

- Multimodal** Telegram assistant for the digital inclusion of older adults. Role: technical co-lead in a team of three.
- Computer vision** to read invoices and detect scams, plus sentiment analysis that adapts tone and raises risk alerts. Deployed on a **Linux VPS** to run 24/7.
- First place among more than 30 teams and 600 applicants, before a jury from Samsung, Randstad and Streambe.

AXIS — Autonomous agents, IBM Hackathon | 2026

- System of **specialised agents** on Llama models, connecting legal contracts to a company's daily operations.
- Mandatory evidence** protocol: no decision is issued without citing the document backing it. Orchestrated on watsonx, integrating Jira, Slack and Trello.

OptiVision — Fuegian Iathon | 2026

- Computer vision** for industrial ergonomics and quality control on the factory floor, without stopping production. **Working MVP in 8 hours**.
- Webcam detection of risky postures, contactless gesture operation and a live supervision dashboard.

Hotel demand forecasting — Machine Learning | 2025

- XGBoost** regression model forecasting hotel occupancy in Tierra del Fuego, with missing-value imputation and feature engineering on seasonality.

TECHNICAL SKILLS

AI and LLMs: RAG (Retrieval-Augmented Generation), LangChain, ChromaDB, local Llama models, multi-agent architectures, IBM watsonx, prompt engineering, on-premise deployment.

Data and machine learning: Python, Pandas, NumPy, Scikit-learn, XGBoost, SQL, Power BI, ETL, computer vision, speech-to-text and text-to-speech.

Development and infrastructure: Flask, React, Node.js, JavaScript, object-oriented programming, Linux, VPS management, systemd, Docker, Git and GitHub.

Security and compliance: NIST CSF 2.0, ISO/IEC 27001, MITRE ATT&CK, bias auditing, prompt injection and data leakage prevention.

Languages: Spanish native · English intermediate B1.

EDUCATION

Full Stack Developer Scholarship, MERN stack — ITBA Executive Education and Santander Open Academy | 2026 | One of 400 selected

University Technical Degree in Programming — Universidad Tecnológica Nacional (UTN) | 2026 – In progress

Higher Technician in Data Science and Artificial Intelligence — Centro Politécnico Superior Malvinas Argentinas | 2024 – 2025

Samsung Innovation Campus, Big Data & AI — Samsung Electronics Argentina | 2025 | 140 hours plus Capstone Project

Artificial Intelligence for Business — Digital House | 2024 – 2025
